## **DETAILED ACTION**

### ***Claim Objections***

1. Claims 1-7 and 8-11 are objected to because of the following informalities:

With respect to claim 1, the term “selectively” appears to be out of place because applicants deleted the phrase “two or more power sources.”

With respect to claim 8, the claim does not set forth sufficient steps involved in “the method of operating a multi-mode DC/DC converter,” the scope that applicants are intending to encompass is unascertainable. Claims fail to recite sufficient active, positive steps delimiting how this method is actually practiced. Furthermore, it is unclear how the “voltage droop” is symmetrical to without setting forth a reference point.

Appropriate correction is required.

### ***Response to Amendment***

2. Since the newly submitted claims 8-11 and the amended claims 1-7 are conflicting with the invention of U.S. Patent No. 6,680,604, the following double patenting rejection is followed

### ***Double Patenting***

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and; *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-9 and 11 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-3, 5, 7, 9, 27, and 29-34 of U.S. Patent No. 6,680,604. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims 1-3, 5, 7, 9, 27, and 29-34 of the patent 6,680,604 discloses creating a droop in an output signal to the load in response in part to a signal from the power source and in response in part to the operating mode of the load such that the droop is substantially symmetrical throughout the operational modes of the DC/DC converter.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1 and 8-11 are rejected under 35 U.S.C. 102(a) as being anticipated by the acknowledged prior art as shown in figures 1 and 3.

The figure 3 clearly shows the Traditional Droop (voltage droop) which is substantially symmetrical to the one of performance optimized mode. Moreover, prior art Figure 1 shows the use of a feedback loop to adjust the voltage droop and to alter a slope of a load line in accordance with an operating mode to adjust the voltage droop.

***Response to Arguments***

5. Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

*Conclusion*

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
